  - Input validation

- RestAPI
- MySQL and Firebase
- Git and Github
- Figma & Adobe XD
- Understanding UI Design
- Basic Python

Languages:

- English - Level C1
- Polish - Native

Introduction

Web developer experienced in creating responsive web applications using modern technologies such as React JS.. I'm able to write and deploy code in various programming languages listed in the skills section. I'm looking for the opportunity to grow in the professional field of computer science and web development.

Soft skills

I'm always very thrilled and enthusiastic about working with other people. I consider myself a team player. Furthermore, I have no problems with communication; I always find a common language with others. Within the hours I spent coding, I learned that it's important to pay attention to details. I'm really pedantic and fussy. Also, I'm very open-minded, so when it comes to challenges, I'm ready to learn new things and try them myself.

Education

2023 – 2027

Polish-Japanese Academy of Information Technology

Warsaw, Koszykowa (IT Profile)

Currently, I'm studying a computer science program at PJATK. I'm eager to expand my knowledge and improve myself in the development section. Right now, I've started to learn about Java. I don't have lots of experience with the backend, so I'm really glad that I will become more versatile.

2019 – 2023

Technical school of electronics No. 1

Warsaw, Marcina Kasprzaka (IT Profile)

I graduated in April 2023 and achieved a technician title. For 4 years, I was conscientiously learning and practicing in the field of computer science.

Experience

2021

Komandor S.A.

Trainee Web Developer | Sep 2021 - Dec 2021

I had a 4-month internship as a web developer. I was introduced to company projects, work flow, and technology. Furthermore, I was working under the supervision of the web development team. The job entailed creating and maintaining a website from scratch.

Certificates

2023

Official IT Technician Certificate

I passed two professional technical exams in the field of information technology with an average score of 95%. Listed below:
- EE.08/INF.02 | Programming & databases
- EE.09/INF.03/E.14 | Hardware & computer networks
